### INTRODUCTION

PRECOR<sup>®</sup>IGR CONCENTRATE acts on an immature life stage of the flea, preventing the adult flea from developing. Flea eggs deposited on and larvae crawling onto treated areas will not develop into adult fleas. Existing adult fleas and flea pupae are not affected. If a high population of adult fleas (the biting stage) is present, the use of an adulticide may be necessary for immediate relief. For best results, use PRECOR IGR CONCENTRATE prior to the flea season,

When applied to surfaces where fleas are found, such as carpets, upholstered furniture and pet sleeping areas, PRECOR IGR CONCENTRATE prevents adult flea emergence for 7 months. Flea control on pets is important in prevention of introduction of adult fleas indoors. When using this product, and fleas are problems on pets, the pets should be treated with an effective registered flea control product to prevent the introduction of adult fleas indoors.
